

Video Conferencing Camera Solution

We have 2 types of Video conferencing solution that you can choose from **The Meeting Owl** and the **Logitech Conferencecam Connect**.

The Meeting Owl

The Meeting Owl is a video conferencing camera that is in the Munk Front Office. It provides a 360° view of the room and automatically pans around to focus on who's talking. It creates a great meeting experience for everyone - whether they are in room or calling in.

You can see how it works [here](#) and also at your next meeting! You don't need to install any extra software. Zoom is still our calling platform- the Meeting Owl simply becomes the camera and the mic. Directions on how it works are in this Wiki [Meeting OWL Pro Video Conference Guide](#)

The Logitech Conferencecam Connect

Simplify video conferencing so anyone can set it up and run a meeting anywhere. Make it affordable so you can outfit every conference room with video. Designed for huddle rooms and home offices, Logitech Connect is also compact and mobile so you can take it throughout the workplace and around the world. You can see how it works [here](#) and also at your next meeting. Directions on how it works is in this Wiki [Logitech Conferencecam Connect](#)

Thanks!
